CONSUMER PRICE INDEX
All Urban Consumers (1982-1984=100)

To figure the percentage increase between any two months: subtract the index for the earlier month from that of the later month. Divide that number by the index for the earlier month. And then multiply by 100 by moving the decimal two places to the right.

Year	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Percent Increase Jan - Dec
1966	31.8	32.0	32.1	32.3	32.3	32.4	32.5	32.7	32.7	32.9	32.9	32.9	3.5
